2012 Dues Invoice

12/01/11

Renew Today !

Dear NCSF Member,

Your support last year has made possible exciting and worthwhile programs at the Northern Cross Science Foundation. The Foundation is bringing to the community opportunities for growth in Astronomy and other science related endeavors. Please consider another year with the NCSF and continue to enjoy the wide variety of programs and activities that are both entertaining and educational. Membership also includes the club newsletter Spectrum, discounts on magazine subscriptions. Access to the club's observatory and equipment and membership in the Astronomical League.

* If you have been a member for over 1 year your membership dues are required to be paid in January. Please take the time to fill out the form below by checking the appropriate box, fill in additional family names if it applies.

* If you have an existing Astronomy magazine subscription, now is the time to add an additional one or two years. Even if your subscription does not expire in the near future, this will insure no interruptions in deliveries or the hassle of expiration notices to deal with later. Please check the appropriate box below. Astronomy Magazine can only be renewed through the club to receive the discount rate.

* If you have an existing Sky & Telescope magazine subscription, continue to renew it on your own whenever you receive their standard notice. A club discount rate will automatically be offered.

Please calculate the total cost, print your name, date and supply your signature to complete the form. Take this form with payment to our next regular meeting. If that date becomes inconvenient, simply mail a check with completed form to the NCSF treasurer's address below. Your prompt attention to this notice is greatly appreciated.
